

STATEMENT OF QUALIFICATIONS

Klober Engineering Services was founded in 1998 by Philip J. Klober. Its primary goal is to provide quality, innovative civil and environmental engineering services to the Tennessee and Kentucky area. Our engineering staff members are all trustworthy Christian individuals who have a total of over fifty years experience and who impart caring respect for each client and their project. We take pride in having performed work in over 35 counties and having developed a good rapport with the clients and regulators in all locations. We offer a special blend of experience and capability in applying the latest design techniques and products to fulfill every need from Greenbuild and LEED applications to NPDES Phase 1 and 2 environmental compliance.

Our services have included the following categories:

- Public, Residential, Commercial and Industrial Site Design
- Land Planning
- Complete Subdivision Layout and Design
- Water and Wastewater Design
- Site Sewage System Design
- ADA Site Compliance
- Environmental Assessment and Permitting
- Watershed Modeling
- Drainage Assessment and Design
- Erosion Control Design and Inspection
- Preparation of Stormwater Pollution Prevention Plans and Aquatic Resource Alteration Permits
- Retaining Wall Design (Segmental and Concrete)
- Foundation Design
- Foundation Inspection and Certification for HUD Requirements
- Forensic Investigation of Drainage and Structural Issues

Specific types of projects include:

- Industrial and Technology Complexes (10,000 sq. ft. to 1,000,000 sq. ft. under roof)
- Religious Facilities
- Educational Facilities
- Commercial Sites (Restaurants, Shopping Centers, Ministorage, etc.)
- Senior Living Facilities (Alzheimer's Care Units, Assisted Living Complexes, and Nursing Homes)
- Residential Subdivisions (Single Family and Multifamily Units)
- Public Buildings
